

## **Fall 2022 Graduate Certificate in Technical Leadership Workshop Series**

**Workshop 1** – Wednesday, November 9, 5:00-7:00 p.m., Room 32-144 **\*\* NEW DATE \*\***  
*Event date changed from September 29 to November 9.*

### **Welcome Back! Learning from games to build high performing teams**

By David Niño and GradSAGE

Join us for the first workshop of the semester playing a collaborative, under-the-sea-themed game. Learn about team interactions, why they can sometimes go wrong, and what you can do to manage these dynamics in the future.

**Workshop 2** – Wednesday October 12, 5:00-7:00 p.m., 32-144

### **Career and technical leadership paths in industry**

By Reza Rahaman

This workshop highlights the role of the career progression options available in technical organizations AND the types of technical projects being undertaken by the organization in determining a path that maximizes growth and satisfaction for an Emerging Engineering Leader as their Leadership Skills develop.

**Workshop 3** – Wednesday October 26, 5:00-7:00 p.m., Room 32-144

### **Foundations for personal integrity in technical contexts**

By Jim Magarian

This workshop centers on an interactive case analysis in small student groups. An introductory lesson frames the decision-making of technical professionals in terms of integrity and professional ethics concepts. Tools for decision analysis are presented, and students develop awareness of contextual variables that tend to strain integrity. Session concludes with case analysis debrief.

**Workshop 4** – Thursday November 17, 5:00-7:00 p.m., Room 32-144

### **Managing up your advisor or supervisor**

Jacqueline Goldstein

Our relationships with research advisors and professional supervisors have a tremendous effect on our well-being and growth. This workshop will teach principles and skills to help you “manage up” your supervisors here at MIT and beyond, creating more positive, productive working relationships. Skills will include identifying the overlap between your interests and your advisor's, advocating for your own needs, and optimizing your day-to-day interactions.
